EXPERIENCE

- Front-End Developer** May, 2025 - Present
InformConsulting, LLP | Almaty, Kazakhstan
 - Built responsive healthcare web applications using React 19, Next.js 16, TypeScript, and Tailwind CSS 4, following component-driven architecture and accessibility standards.
 - Worked closely with backend developers, DevOps engineers, and team leads through structured code reviews and sprint planning to deliver reliable features on schedule.
 - Applied frontend performance best practices — lazy loading, code splitting, and efficient re-renders — to maintain fast load times and smooth user experience across devices.
- Full-Stack Developer** Sep 2024 - Oct 2025
Freelance | Aktau, Mangghystau
 - Developed and maintained an admin dashboard for a clothing-selling application using Vue.js and Spring Boot, following RESTful API design patterns and clean code principles.
 - Gathered requirements directly from stakeholders through regular check-ins, translating business needs into technical solutions for product management, order tracking, and user roles.
 - Designed responsive interfaces with Vue.js prioritizing intuitive navigation and clear data visualization, and built a static website using React and Vite with optimized performance and consistent UI/UX.
- Full-Stack Developer** Jan 2023 - Aug 2024
Far Tech | Kuala Lumpur, Malaysia
 - Created and managed a chatbot using React, Twilio API, and Google Cloud, following modular architecture to keep the codebase maintainable and testable.
 - Worked directly with banking clients to scope requirements and iterate quickly, ensuring each release addressed real user pain points.
 - Coordinated with cross-functional teams across frontend, backend, and QA to ensure seamless integration and deployment, using version control workflows and structured testing before each release.
